## Education

- Ongoing    **PhD in Computer Science Didactics**  
Department of Informatics, University of Bergen
- 2021        **Master's in Informatics** specialising in Logic.  
Department of Informatics, University of Bergen
- 2019        **Bachelor's in Cognitive Science** specialising in Informatics.

My research interests are centred around improving programming instruction in higher education. Specifically, my projects focus on assessing student prior knowledge and integrating this knowledge into how introductory programming courses are taught. Additionally, I investigate the importance of the *sense of belonging* within the computer science field. I explore how students' effort, attrition, performance, and engagement are influenced by their sense of belonging to their peers, institution, and faculty.

## PhD Project

I lead the project [\*PIKA: Prior Informatics Knowledge Assessment\*](#) - an international initiative mapping students' prior programming knowledge before they enter higher education. PIKA is an assessment tool developed by me and "Introduction to Programming" instructors across Norway and Sweden. In 2024, it was distributed to 3,260 students at nine institutions.
